

GEOCHEMIST/SENIOR RESEARCHER

We are looking for a geochemist/senior researcher for a permanent post in the eastern Finland office in Kuopio.

Your duties will include researching the mining environments' biogeochemical processes and related mineralogy in the mining environment group. As a member of the group, you will participate in the development of the mines' environmental impact management, environmental risk assessment and its tools in co-financed and contract projects.

We expect you to have an advanced academic degree that is suitable for the post. We require you to be competent in mining environments' biogeochemistry and environmental mineralogy. A doctorate degree and experience in mining environments' risk assessment, passive treatment methods for mine waters, geochemical modelling and biogeochemical research of aquatic sediments will be regarded as a plus.

We offer you interesting and challenging tasks as well as the opportunity to develop further as a member of a diverse, youthful team of experts.

The salary will be determined by requirement class VL 8–9 and the competence of the person appointed to the post. The overall salary upon start of employment is approximately €3,147 – €3,804 per month.

For more details, please contact: Tommi Kauppila, Chief Scientist, phone +358 40 528 4622 or Maria Nikkarinen, Environmental Geologist, phone +358 40 586 3020

Deadline for application (also include your CV) submission: 14 October 2011, 16:15 p.m. The address is: Geological Survey of Finland, Register Office, PO Box 96, 02151 Espoo (street address: Betonimiehenkuja 4, Otaniemi) or email: gtk@gtk.fi. Write "Geochemist/senior researcher" on your application.
